Re: Transitions to Bridge Parapets BPL 100 Series Parapets to Safety Fences.

Dear Mr Mackay,

We refer to your letter of 19th December 2007 and enclosures requesting approval of the transitions to BPL 100 Series Parapets.

In light of recent information received from CEN TC226, the Authority is currently reviewing its requirements that all safety barriers transitions be tested to meet the requirements of ENV 1317 Part 4 as outlined in NRA BD 52 /07 and NRA TD 19/07 published in December 2007.

In the meantime we have no objection to the use of BPL transitions with BPL 100 Series Parapets on NRA projects until further notice. I refer to Drawings BPL-100-27; BPL-100-28; BPL-100-29 and BPL-100-30 included in your submission of 19th December 2007.

Yours sincerely

Helen Hughes
